

# CLM in a changing world

## CLM and sustainability planning - Challenges and Questions

**Maureen Luba, International AIDS Society, Malawi**

# What does sustainability mean for community-led monitoring?

- Well-established CLM programs with adequate infrastructure
- Community ownership of CLM data
- CLM as part of the broader health systems and a top priority for the Government
- Strong collaboration between implementers and government

# What does sustainability mean for community-led monitoring?

- Sustained technical support for both nascent and maturing programs
- Intensified CLM data use for advocacy
- Building leadership within communities

# What does sustainability mean for community-led monitoring?

- Maintaining CLM as a priority for the HIV response
- Inclusive of all populations (including key and vulnerable populations)
- Scaling up of the CLM program beyond HIV

# CLM and sustainability planning – Key Challenges

- In-sufficient Funding; more funding data generation
- CLM Funding mechanism; do we need an intermediary for CLM funds?
- Policies on data access and ownership
- Coordination across CLM programs

# Key Takeaways

AIDS 2024

- Sufficient funding for CLM programs
- Community ownership and leadership
- Inclusion of key and vulnerable populations
- Alignment with national and global priorities for HIV, TB and other disease responses
- CLM as part of the broader health system

**Thank you!!**
